# Keep Results on Track

Too often, a strategy fails for lack of execution. Without an effective follow-through tool, the best laid plans — and anticipated results — are left unfulfilled.

ResultsEngine® is the follow-through management system that ensures accountability among team members to get the desired outcomes. By sharing objectives, milestones, status and concerns in a customized interface, team members and senior management can monitor execution and progress. Results can be analyzed and measured quickly. Programs stay on track.

## Benefits

- Boosts accountability by sharing each member's objectives and progress with the team and senior management.
- Graphs progress and forecasts against goals for each reporting period to highlight status and issues.
- Fosters collaboration among team members with shared folders, message boards and quick-communication tools.
- Geographically diverse team members can share information and progress, and check the status of other project components.
- Reduces verbal progress reporting during meetings – saving time for everyone!

## Features

- Simple, intuitive interface; no formal training is required.
- Web-based format does not require corporate IT installation or support.
- Customizable to your organization's needs, including goal setting and timing.
- Well-suited for task forces, management teams and change initiatives.
- Proven results coordinating worldwide management teams for companies of all sizes.

- Ease of use aids compliance
- Simple reporting tools for staff and leaders
- Increased accountability keeps goals in focus
- Continuous exposure to commitments
